CHOICE LEARNING

DIFFICULTIES WITH SOCIAL SKILLS

1. My aim is to empower all students. Giving them options to enable them to choose an alternate path with positive results.

2. It is my intention to use a drama based program to teach Social Skills to children.

3. Working within the school a comprehensive program will be aimed at children between the ages of 5-18 in groups of up to six. Or privately (one to one) as required.

4. The program will focus on different styles of communication and the importance of a positive relationship between; ages, genders, peers, siblings, parents, adults and also teachers to students. In order for them to be able to receive the abundance of benefits and rewards that each has to offer.

5. With many years of experience in this area a tailored program will be established to suit each student.

6. Consultation with teachers and co-ordinators as required.

7. References and testimonials upon request.

8. Partial funding may be available to approved students.
