Dear Parents,

Preparations have begun for our 'Space Expo' night on Thursday 17th March.

The students have enthusiastically started their projects, researching information about a selected planet of the Solar System. The end task of the project is to present their 'findings' at the Space Expo. The presentations will take various forms, depending on the choice of each group. All of them, we're sure, will be imaginative and creative and will be the result of much effort and teamwork.

Looking at, and talking to, the various exhibitors will be what our Space Expo evening comprises of. This will start at 7pm. (Students to arrive at 6.45pm please to be ready to start on time).

After deliberation we have decided to make the evening an adult/Senior Primary students only event. This is to ensure that there are not too many people at our Expo sites. It will also make the evening especially about your Senior Primary student. We understand that for many this will mean that only one parent can attend due to babysitting issues. We are sorry for this inconvenience, and do not mean to exclude people, yet we feel our reasons for making it 'sibling free' are important. We will open the Expo for the last part of the school day (2:40 – 3:05) for those of you who will be unable to come to the night session. This will enable you to have a look if you would like to and won't miss out completely. Siblings who are Primary School age will get to view the Expo during the day.

We anticipate the evening will finish by 8.30pm at the latest.

We look forward to a great evening together!

Please contact us should you have any questions.

Thanking you,

The Senior Primary Teachers

Please Note: It is important that all students are able to attend. They are part of a team, and the presentation of their ideas is an important part of this learning task. If this is impossible for your family please let us know.
